

FSFC Definitions & Terminologies

Note: All AU estimates are currently using data from Operator #002 (Skywalker) and are based on their performance up to October, 2025 and are subject to change.

- **AC:** Anomalous Cognition. In this project, dual-faceted ESP using RV and precognition for future targets. ~3-5 AU, causes neurological fatigue.
- **ACS:** Anomalous Cognitive Stamina. Weighted combo of AUC, neural conditioning, state, health; estimates data generation capacity.
- **AU:** Anomalous Units. Unknown energy for AC; 1 AU \approx 1 FCCT.
- **AUC:** Anomalous Units Capacity. Operator's energy pool; estimated via FCT (n=1 baseline).
- **CACR:** Chronological Anomalous Cognition Range. Time (seconds) for accurate AC (10-15%+ > noise).
- **FCT:** Forced Choice Test.
- **FCAT:** Forced Choice Alphabet Test. ~1-2 AU.
- **FCCT:** Forced Choice Color Test. ~1 AU.
- **FCZT:** Forced Choice Zener Test. ~1-2 AU.
- **FCPT:** Forced Choice Positional Test. (Undetermined Cost)
- **RV:** Remote Viewing.
- **SACR:** Spatial Anomalous Cognition Range. Distance (meters) for accurate AC (10-15%+ > noise).
- **Op:** Operator. Top 1% ESP performer; repeatable under lab conditions; structured profile (strengths, weaknesses, trends, performance, regiment, CV).
- **PL:** Project Logs.
- **ESP:** Extrasensory Perception. General anomalous info acquisition.
- **PSI:** Parapsychological phenomena (e.g., AC, ESP).
- **AOL:** Analytical Overlay. Conscious interference in RV data (from subconscious note).
- **SNR:** Signal-to-Noise Ratio. AC accuracy vs. hallucinatory noise (e.g., auditory/olfactory at 0% from "How I RV.rtf").
- **CBP:** Component-Based Perception. Deconstructing targets into elements (strength from Gemini report).
- **GB:** Gestalt Blindness. Difficulty synthesizing components into wholes (weakness from Gemini).
